Fact Sheet

David Kaufmann

pip install pandas

➔ Install pandas with pip

import pandas as pd

➔ Import pandas with alias pd

.loc

➔ Access a group of rows and columns by label(s) or a boolean array

.DataFrame

➔ Two-dimensional, size-mutable, potentially heterogeneous tabular data

.read_csv

➔ Read a comma-separated values (csv) file into DataFrame

.read_json

➔ Convert a JSON string to pandas object

pip install pysqlite3

➔ Install pysqlite3 with pip

import sqlite3

➔ Import pysqlite3

sqlite3.connect

➔ Connect to a database

.read_sql_query

➔ Read SQL query into a DataFrame

.set_index

➔ Set the DataFrame index using existing columns

.to_csv

➔ Write object to a comma-separated values (csv) file

.to_json

➔ Convert the object to a JSON string

.to_sql

➔ Write records stored in a DataFrame to a SQL database

.head

➔ Return the first *n* rows for the object based on position

.tail

➔ Returns last *n* rows from the object based on position

.info

➔ Print a concise summary of a DataFrame (including the index dtype and columns, non-null values and memory usage)

.shape

➔ Return a tuple representing the dimensionality of the DataFrame

.drop_duplicates

➔ Return DataFrame with duplicate rows removed

.columns

➔ The column labels of the DataFrame

.rename

➔ Alter axes labels

.isnull

➔ Detect missing values for an array-like object

.sum

➔ Return the sum of the values over the requested axis

.dropna

➔ Remove missing values

.mean

➔ Return the mean of the values over the requested axis

.fillna

➔ Fill NA/NaN values using the specified method

.describe

➔ Generate descriptive statistics

.value_counts

- ➔ get a Series containing counts of unique values

.corr

- ➔ Compute pairwise correlation of columns, excluding NA/null values

.iloc

- ➔ Purely integer-location based indexing for selection by position

pip install matplotlib

- ➔ Install maplotlib with pit

import matplotlib.pyplot as plt

- ➔ Import matplotlib with alias plt

plt.rcParams.update

- ➔ Change plt parameters (e. g. font and plot size)

.plot

- ➔ Make plots of Series or DataFrame

.boxplot

- ➔ Make a box plot from DataFrame columns
