

Big Data

In short: a field that treats ways to analyze, systematically extract information from, or otherwise deal with data sets that are too large or complex to be dealt with by traditional data-processing application software

Image: Big data is complex in its structure and often filled with errors

Data Science

In short: a field of study that aims to use a scientific approach to extract meaning and insights from data

Machine Learning

In short: algorithms whose performance improve as they are exposed to more data over time

Artificial Intelligence

In short: a program that can sense, reason, act and adapt
